Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	<p>describes a mosquito net impregnating composition containing a mixture of insecticide and/or insectifuge. The insecticide is either a pyrethroid, or a non-pyrethroid insecticide selected from among the carbamates and the organophosphorus compounds. In the light of D3, the problem addressed by the present application is that of improving the effectiveness against mosquitoes of compositions containing a non-pyrethroid insecticide.</p> <p>Clearly, not all the combinations of a non-pyrethroid insecticide and an insectifuge in any proportions will solve the problem addressed by the present application. The selection of the insecticide/insectifuge combinations and the concentrations thereof is essential for achieving the invention. For this reason, the subject matter of claim 9 cannot be considered inventive. However, the subject matter of claims 11 and 14 is considered inventive (PCT Article 33(3)). Claims 11 and 14 relate to a specific proxopur/DEET mixture of which the effectiveness, as demonstrated in the examples, could not be foreseen from the cited prior art.</p> <p>Claims 1 to 14 are considered to be industrially applicable (PCT Article 33(4)).</p>
